

Let us entertain you

**Jamo D600**

Imagine that you can experience the amazing sound quality you hear in the best cinemas in the world – but in the comfort of your own home. The D 600 is the newest Jamo sound system that is built and approved to the same quality standards as the best movie theaters in the world namely THX. This highly advanced Jamo system meets the THX Ultra 2 standard, but is a truly musical hi-fi speaker system.

Consisting of carefully designed elements equipped with advanced technology, these speakers are not only able to reproduce the same powerful and detailed sound that you would only expect in real life or the best cinemas, but they are also able to present a sound-stage that is as large in scale and physical appearance that it is hard to believe.

The D 600 system is elegant and discreet, fashioned in a modern and graphic style that is able to blend in easily with the interiors in most modern homes.

**State-of-the-Art technology**

Jamo has developed driver units especially for this high-end THX Ultra 2 system. Identical drivers used in both the LCR and surround-speakers result in perfect balance across the speakers, and a 15"/1600W subwoofer equipped with Motional Feedback, ensures a dynamic, detailed and precise reproduction of even the lowest spectrum. The subwoofer is equipped with a unique touch interface which gives the user a variety of settings.
